Ashish Kharche

Senior Android Engineer | Kotlin · Jetpack Compose · Payments · CI/CD

London, UK · thekharche@gmail.com · linkedin.com/in/ashish-kharche · ashishkharche.com

Profile

Senior Android engineer with four years of commercial Kotlin and Jetpack Compose at Paythru, working on six white-label EV charging and payment apps on Google Play. Built the Terminal app for Adyen payment terminals, tested on a Castles S1U2 device, and rebuilt the Bitrise release pipeline. Has written on mobile UI testing for the Maestro blog. Available immediately. Right to work: on a UK Skilled Worker visa; needs sponsorship for a new employer.

Skills

Android: Kotlin, Jetpack Compose, Coroutines, Flow, Hilt, MVVM, Google Play Console
Testing: JUnit, Maestro, Appium, snapshot testing, emulator testing, regression and release testing
Payments: Adyen (in-app, Terminal API, webhooks), payment terminals
CI/CD and monitoring: Bitrise, GitHub Actions, fastlane, Firebase Crashlytics, Remote Config and Analytics
Back end: TypeScript, Node.js, REST, WebSockets, AWS (CDK, ECS Fargate, Lambda, RDS PostgreSQL, SQS)
iOS: Swift, SwiftUI (Workout Director)

Experience

Paythru Limited, London · Oct 2022 to Oct 2026
Senior Mobile Engineer (Mar 2024 to Oct 2026) · Mobile Engineer (Oct 2022 to Feb 2024)
EV charging and payments · iOS and Android apps, then AWS platform work · product and engineering team of 10

- Built EV charging features for six white-label Android apps on Google Play, in Kotlin and Jetpack Compose with MVVM.
- Built the Kotlin and Jetpack Compose Terminal app for Adyen payment terminals, tested on a Castles S1U2 device: REST and WebSocket link with heartbeat and jittered reconnect, a locked-down local control server, PIN lockout, screen-capture blocking and no card data in logs.
- Integrated Adyen for in-app and terminal payments.
- Rebuilt the Bitrise CI/CD pipeline so any commit could be released to Google Play, shortening the release cycle.
- Used Firebase Crashlytics and Remote Config in production.
- Tested with Maestro UI flows, snapshot tests and JUnit; every Terminal app change tested on an emulator before push.
- In 2026, worked on Paythru's new TypeScript payments platform on AWS (CDK, ECS Fargate, RDS PostgreSQL, Lambda, SQS), including idempotent Adyen webhooks and a double-charge guard.

Maestro (maestro.dev) · Mar 2023 to Sep 2024
Developer, contract alongside Paythru · mobile UI testing framework

- Wrote Android test suites for Maestro Cloud and Studio with CI on Maestro Cloud, GitHub Actions and Bitrise, plus product guides and starter sample repos.
- Wrote 17 posts for the Maestro blog (maestro.dev/blog): cross-platform Android and iOS testing, React Native and Expo, Flutter, API mocking with WireMock, and CI on Bitrise and GitHub Actions.

SpaceX Super Intelligence (SpaceXSI), formerly xAI · Part-time · Jan 2026 to Oct 2026
Quality Assurance Engineer

- Carried out regression and release testing on the Grok iOS and web apps across chat, Imagine, Build and MCP, including payments, subscriptions and sign-in.
- Checked changelogs, gave release sign-off, and logged reproducible bugs in Linear, working them through with engineers until each build was ready for release.

Independent Projects

Workout Director, iOS (published on the App Store by Shelgaon Ltd) · Live since Oct 2026

- iPhone training app in Swift and SwiftUI: on-device pose tracking counts reps from the camera, with a voice coach (Live Coach), AI trainer chat and Apple Health sync. apps.apple.com/gb/app/id6813645709
- TypeScript back end on AWS Lambda and DynamoDB, defined in AWS CDK. Feature-flag kill switches and a server-driven minimum app version for safe releases.

Education and Certifications

MSc Software Engineering, Kingston University, London · 2021 to 2022
AWS Certified Solutions Architect - Associate and AWS Certified Cloud Practitioner (both expired Feb 2025)
