Ashish Kharche

Senior Mobile Engineer (iOS) | Swift · SwiftUI · SwiftData · App Store releases

London, UK · thekharche@gmail.com · linkedin.com/in/ashish-kharche · ashishkharche.com

Profile

iOS engineer working in Swift and SwiftUI. Built Workout Director, an iPhone training app that counts reps on the device from the camera, and Kalo, a macro and calorie tracker, both published on the App Store by Shelgaon Ltd. Four years on payment apps at Paythru, latterly as Senior Mobile Engineer across iOS and Android. Available immediately. Right to work: on a UK Skilled Worker visa; needs sponsorship for a new employer.

Skills

iOS: Swift, SwiftUI, UIKit, SwiftData, Combine, Swift concurrency, Swift Package Manager, MVVM
Apple frameworks: HealthKit, WidgetKit, App Intents, CloudKit, AVFoundation, Speech, PhotosUI, Sign in with Apple, WebRTC, MediaPipe
Testing and release: XCTest, XCUITest, Maestro, Appium, snapshot testing, XcodeGen, fastlane, TestFlight, App Store Connect
Back end and tooling: RevenueCat, PostHog feature flags, TypeScript, AWS Lambda, DynamoDB, CDK, Firebase, Adyen
Android: Kotlin, Jetpack Compose (four years commercial)

Independent Projects

Workout Director (published on the App Store by Shelgaon Ltd) · Live since Oct 2026

- iPhone training app in Swift and SwiftUI: on-device pose tracking (MediaPipe) counts reps from the camera; a voice coach (Live Coach) streams audio over WebRTC; AI trainer chat; Apple Health sync. apps.apple.com/gb/app/id6813645709
- Design-system, core and services Swift packages, shared with Kalo; SwiftData, some UIKit.
- Release safety: PostHog feature flags with per-feature kill switches and a server-driven minimum version that forces old builds to update, so features roll back without a new App Store build.
- Sign in with Apple and Google, RevenueCat subscriptions, TypeScript back end on AWS Lambda and DynamoDB (CDK); scripted TestFlight and App Store releases, handling App Review rejections.

Kalo: AI Macro Tracker (published on the App Store by Shelgaon Ltd) · On the App Store

- Macro and calorie tracker in Swift and SwiftUI on the same packages: photo, voice and barcode logging, Open Food Facts, AI proxy back end; HealthKit, CloudKit, WidgetKit, App Intents, RevenueCat. apps.apple.com/gb/app/id6752915724
- XCTest, XCUITest and on-device end-to-end tests; cleared App Review's health-citation rules (guideline 1.4.1) for the 1 Oct 2026 release.

Experience

Paythru Limited, London · Oct 2022 to Oct 2026
Senior Mobile Engineer (Mar 2024 to Oct 2026) · Mobile Engineer (Oct 2022 to Feb 2024)
EV charging and payments · iOS and Android apps, then AWS platform work · product and engineering team of 10

- Built EV charging features across six white-label apps: Kotlin and Jetpack Compose on Android, with Swift and SwiftUI work on iOS.
- Integrated Adyen for in-app and terminal payments.
- Rebuilt the Bitrise CI/CD pipeline so any commit could be released to the stores, shortening the release cycle.
- In 2026, worked on Paythru's new TypeScript payments platform on AWS (CDK, ECS Fargate, RDS PostgreSQL, Lambda, SQS), including idempotent Adyen webhooks and a double-charge guard.

Maestro (maestro.dev) · Mar 2023 to Sep 2024
Developer, contract alongside Paythru · mobile UI testing framework

- Wrote iOS and Android test suites for Maestro Cloud and Studio with CI on GitHub Actions and Bitrise; wrote 17 posts for the Maestro blog (maestro.dev/blog) on cross-platform testing, React Native, Flutter, WireMock mocking and CI.

SpaceX Super Intelligence (SpaceXSI), formerly xAI · Part-time · Jan 2026 to Oct 2026
iOS Quality Assurance Engineer

- Carried out regression and release testing on the Grok iOS app across chat, Imagine, Build and MCP, including payments, subscriptions and sign-in; gave release sign-off and tracked bugs in Linear with the iOS engineers.

Education and Certifications

MSc Software Engineering, Kingston University, London · 2021 to 2022
AWS Certified Solutions Architect - Associate and AWS Certified Cloud Practitioner (both expired Feb 2025)
